The fine ART of bathing

JOICE

Walk In ⊕

WORLD'S FIRST!
Patent pending.

The first **barrier-free** walk-in shower,
in which you can also take a **bath!**

Modern **2 in 1 concept**

for frequent shower-takers and occasional bathers!

NEW: JOICE Walk In⊕: Trendy walk-in solution with the bath-plus!

A large glass front in-front of a spacious, door-free shower area - this is what characterises this trendy, walk-in shower. With the JOICE Walk-In⊕, this wide glass front creates a modern eye-catching appearance, stylishly set in place using contemporary colours that fade upwards into a transparent optic at the top.

Behind this elegant front is a completely new 2 in 1 concept: The floor level, barrier-free, generously sized shower compartment, can be transformed into a full- sized bathtub in just a few easy steps. For the style-conscious, who like to shower without limits, but don't want to give up bathing completely.

You have the JOICE!

JOICE - The ingenious Walk In⊕ solution for modern bathrooms

- ++ Walk In⊕ shower with door-free access
- ++ Trendy look
- ++ 100% barrier-free
- ++ Wide splash guard
- ++ Converts into a bathtub in a few easy steps
- ++ Full-sized bath tub
- ++ Available in two sizes: 150cm and 160cm, suitable for niche widths of 200cm or more

The new JOICE Walk In ⊕

is a full-sized bathtub.

Bathing in the JOICE

Despite the short tub length, the JOICE offers enough space for a full bath as the straight door panel allows the space to be used to a maximum. And with a tub width of 85 cm, the JOICE offers plenty of room to move.

To bathe, the door panel is added and simply locked into place. A continuous seal around the panel ensures it's reliably watertight. The safety mechanism prevents the drain from closing if the panel is not inserted or is incorrectly inserted.

After bathing, the panel can be put into the storage box and the Walk-In ⊕ is ready for showering again.

(optional)

The new JOICE Walk In⊕

is the cool solution for modern bathrooms.

SHOWERING IN THE JOICE

The new JOICE Walk In⊕ is a cool walk-in solution for modern bathrooms. The wide glass front and the completely floor-level, door-free access make daily showering a unique experience.

After shower care is also a joy with the JOICE. The high tub without any edges and corners and the treated ARTCLEAR glass, make cleaning child's play.

Completely floor-level entry to the shower

Plenty of room for an enjoyable shower experience

You have the JOICE!

Installation Variations

1. Installation in floor - as simple as with a shower tray:

The JOICE tub is sunk 8cm into the floor and glued to the substrate. **The installation is as easy as with the mineral-cast tub, ARTSTONE.** This type of installation is the most stable in use. The installation in the floor means that access to the shower is completely level and barrier-free.

2. Installation on the floor - the quick solution for renovation:

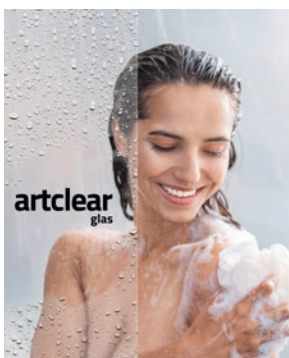

For installation where the tub cannot be sunk into the floor, it is possible to put the tub onto the floor. Only the drainage is set below floor level. This means there is a small 8cm step into the shower area which can be easily managed.

3. Tub and drainage on floor level:

Sometimes it's not possible to dig into the existing floor. With this type of installation, there is a walk-in step of 16.5 cm high. We recommend adding a platform in the entry area, so that floor-level access can be guaranteed.

You have the JOICE!

Easy-cleaning with ARTCLEAR GLASS

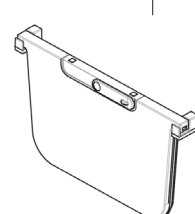

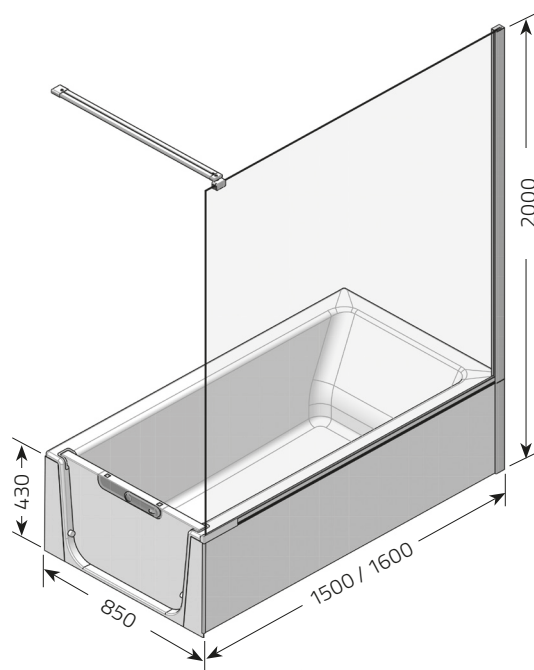

Thanks to the high tub, the hard wearing lower part of the shower area is particularly easy to clean without any corners or edges. The pore-free, smooth acrylic surface is simple and easy to clean.

In addition, the JOICE shower panel can be supplied optionally with the unique ARTCLEAR treated glass to give even easier cleaning for the life-time of the shower!

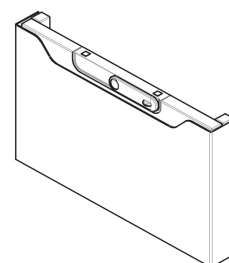

Models and Colours

JOICE 160: 160cm long, 85cm wide.
Left or right entry possible.
Floor dimensions: 60 x 125cm.
Tub capacity: 190L

JOICE 150: 150cm long, 85cm wide.
Left or right entry possible.
